

Workshop Announcement: Introduction to TouchDesigner

Are you ready to explore the world of interactive motion graphics and visual programming? Join us for an exciting workshop where we'll introduce you to the fundamentals of TouchDesigner, a powerful tool for creating immersive visual experiences.

In this workshop, we'll draw inspiration from the iconic Bauhaus movement to explore TouchDesigner's basic principles of visual design and programming. Whether you're an artist, designer, programmer, or simply curious about interactive media, this workshop is perfect for beginners looking for a friendly introduction to TouchDesigner. You'll also get hands-on experience with building your own projects, ensuring practical learning.

After this workshop, you will understand the basics of TouchDesigner enough to start your own projects or follow more advanced tutorials.

Workshop Highlights:

- Learn the basics of TouchDesigner interface and workflow
- Dive into the principles of motion graphics and visual programming
- Create interactive visuals inspired by the Bauhaus aesthetic
- Gain hands-on experience with building your own projects
- Connect with fellow enthusiasts and industry professionals

No prior experience with TouchDesigner is required. In fact, we welcome beginners with open arms. Some basic understanding of programming is helpful but in general, just bring your curiosity and enthusiasm to learn!

Take advantage of this opportunity to kickstart your journey into the exciting world of interactive media with TouchDesigner. Reserve your spot today and get ready to unleash your creativity!
